TO EXTEND ONTARIO TUNNEL

STAR DIRECTORS CONSIDER EX-PERT'S LENGTHY REPORT.

mous in the opinion that should the work be decided upon it would add a great many years to the life of the Daly-West and Daly-Judge mines. Ore shoots of known size and value go down through the Daly-West and into Daly-Judge ground, and while they have not been developed down to water level in the former, they have in the latter, and to handle them in either mine an outlet for the water must either be made in the manner suggested or a few years hence both companies will have to pump if the shoots are mined.

\*\*Herotos of the Star Consolidated Mining company held a protracted session behind closed doors yesterday. They met at 10:30 a. m., and it was 5:30 Golconda. ...61

### BREEZY NEWS FROM NEVADA.

J. W. Langley Tells of Operations

The lowest one showed a width of eighteen inches, the upper one three feet, while between the two the other ledge has an outcrop fully twenty feet wide. Samples taken from the holes sunk on each and all mixed together gave returns of 16.6 per cent lead, i-6 ounces silver and 80 cents in gold per together.

Steven J. Baldwin, who is out in that section looking for good things was anxious to get a lease on these veins for himself and other Salt Lake parties, but Mr. Langley would not listen to his entreaties. Just as fine is the showing which is being made in the new shaft, now down twenty feet. In fact, the ore coming from it is riches than anything heretofore opened in the ground. Bunches of the richest kind of galena are coming in and the ties, but Mr. Langley would not listen to his entreaties. Just as fine is the showing which is being made in the new shaft, now down twenty feet. In fact, the ore coming from it is richer than anything heretofore opened in the ground. Bunches of the richest kind of galena are coming in and the samples brought back by Mr. Langley give every evidence that a mammoth mine must be uncovered in the ground. Work is being prosecuted all over the Lone Mountain section, Mr. Langley says, and every day the evidences of the camp's permanency and strength become more pronounced.

Goldfield's Greatness.

After looking after his interests at Lone Mountain, Mr. Langley made a trip to Goldfield and spent two or three days sizing up conditions at that booming camp. What he saw made him feel like kicking himself to the head silver ore that is 300 feet long and an average of forty feet thick.

Men are now flocking into the old camp and the prospects are that

On the line of this rich streak one of the owners walked a short distance with Mr. Langley, knocked out a sagebrush, scooped up a couple of pounds of the dirt, panned it and got 40 cents' worth of gold. A little farther along a couple of handfuls more were scooped out of a hole which he dug to a depth of eighteen inches or so. The dirt taken welghed about two pounds and \$12 worth of gold was washed from it. Mr. Langley said the performance simply staggered him.

The directors of the Daly-West Mining company met yesterday afternoon
and declared the usual monthly dividend of \$72,000, or 49 cents a share. It
was made payable on the lith to stockbolders of record on the books of the

was made payable on the 15th to stock-holders of record on the books of the company Saturday next, the 9th. The cld custom of closing the books for five or six days preceding payment was set aside, in order that it might be possible to transfer stock in the corporation at all times.

It has just been tipped off on this end of the line that a deal is pending between the Daly-West, Daly-Judge and the Ontario and Daly companies which has for its object the extension of the Ontario company's deep drain tunnel through the balance of Daly territory, thence through the Daly-West and on into the possessions of the Daly-Judge.

The Herald's informant stated that the matter had been under discussion with the completion of the railroad into the company and with the completion of the railroad into the company and with the completion of the railroad into the company and with the completion of the railroad into the company and with the completion of the railroad into the company and with the completion of the railroad into the company and with the completion of the railroad into the company and the company and the company are company as the process of the company and the company are company as the principal mines of to done-haif miles from Goldfield, and just as handy to the principal mines of to-day. Ore is being struck everywhere, and Mr. Langley says other new towns are sure to spring up.

MONTANA-TONOPAH RICHES.

Company Will Make a Record on Completion of Railroad.

A. C. Ellis, jr., who has been in To-nopah for several day's arranging the final details connected with the transfer of the Salt Lake company's property to the Jim Butler Consolidated. It is the completion of the completio and on into the possessions of the Daly-Judge.

The Herald's informant stated that the matter had been under discussion for several weeks past and that the principal purpose of J. E. Bamberger's trip to New York was to confer with Ontario and Daly interests on the subject. Now, it is said, John J. Daly of the Daly-Judge has also gone on for the same purpose, and it is thought here that negotiations will be successful. Upon what lines they are being conducted was not known, but the statement was made that the contemplated extension of the tunnel would cost approximately \$70,000.

Mining operators here who have been given a tip on the subject are unanimous in the opinion that should the work be decided upon it would add a content of the tunnel would and a content of the tunnel would add a content of the tunnel wo

"It is a very voluminous document." said Mr. McMillan, "and it will take some time to digest it. It covers twenty closely typewritten pages and at Lone Mountain and Goldfield.

John W. Langley, president of the Anaconda-Tonopah company, which is operating at Lone Mountain, out of Tonopak, Nev., returned home yesterday morning, after a several weeks trip to camp and the coast. At his company's property Mr. Langley said it had been decided to cease work in the tunnel recently started and sink on one of the main ledges of the ground.

"We want to demonstrate," said Mr. Langley, "what the permanent dips of the veins are. That we can hardly do by running a tunnel unless we go in a long distance. By sinking and cross-cutting we expect to get our bearings much more rapidly and for that reason to pay himself back his portion of the voluntary assessment of 10 cents a share levied a few years ago to meet the obligations of the company, while a company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with it the company has done for several years past. After we get through with the company has done for several years past. After we get through

the veins are. That we can hardly do by running a tunnel unless we go in a long distance. By sinking and crosscutting we expect to get our bearings much more rapidly, and for that reason the new work has been undertaken and the tunnel, for the time-being at least, has been abandoned."

During his stay at camp three new ledges were discovered in the company's Blue Blrd and Blue Jap claims. The lowest one showed a width of eighteen inches, the upper one three

## Metal Market.

Metal Market.

New York, July 5.—Tin was weak in the London market, prices there being more than a pound lower as compared with the closing figures of last Friday, with both spot and futures quoted at £117. Locally the market was easier in sympathy with the foreign losses and closed at 25.56.26.00.

Copper was a little higher in London closing at £37 2s 6d for spot and £37 for futures. Locally copper remains steady. Lake is quoted at 12.62½212.75, electrolytic at 12.50@12.62½ and casting at 12.12½.012.25.

Lead was also a little higher abroad, closing at £11 lls 3d, while here it remained unchanged at 4.356.4.35.

Spelter was unchanged at £25 in London. Here it was easy at 4.65@4.95.

Tron closed at 51s 6d in Glasgod and at 42s 6d in Middlesboro. Locally iron is quiet. No. 1 foundry northern is quoted at 14.56015.00; No. 2 foundry northern at 12.75@14.25; No. 1 foundry scuthern and No. 1 foundry southern soft at 13.55@13.75.

Pig Iron warrants are weak at 9.00.

Coffee and Sugar.

Coffee and Sugar.

New York, July 5.—Coffee—Spot Rio, steady. No. 7 invoice, 7 3-16: mild, steady; Cordova. 9:4012. The market for coffee futures opened steady at an advance of 10@15 points on covering in sympathy with European cables and continued light receipts. Demand was limited, however, and the estimate for Brazilian movement during July running somewhat over expectations, in the afternoon turned easier in the absence of outside buying orders, but after selling off about 5 points recovered the loss and was finally steady at a nat-advance of 10@15 points. Sales were

reported of 25.500 bags, including September at 6.65@6.19; December, 6.35@6.45; March, 6.55@6.57; May, 6.55@6.99.
Sugar-Raw, steady; fair refining, 3.7-18; centrifugal 96-test, 3.15-16; molasses sugar, 3.3-16; refined steady; No. 6. 4.69; No. 7. 4.55; No. 8. 4.50; No. 2. 4.45; No. 10, 4.9; No. 11, 4.35; No. 12, 4.39; No. 13, 4.75; No. 14, 4.29; confectioners' A, 4.85; mould A, 5.35; cut loaf, 5.79; crushed, 5.79; powdered, 5.10; granulated, 5.60; cubes, 5.25.

### Wool Market.

Boston, July 5.—The wool market may be said to be strong and active with a firm ladvance under way. Territory quo-Idaho fine, 17618; heavy fine, 14615; fine medium, 17618; medium, 18619; low medium, 18619.

Wyoming fine, 18617; heavy fine, 14615; fine medium, 176174; medium, 18620; low medium, 26621.

Link and Nevada fine, 16617; heavy fine, 18618. Chicago, July 5.—Unfavorable harvesting weather and a reduction of about 20 per cent in world's saipments were the main causes for a sharp advance in wheat prices today. Final figures on September wheat are 11/401% cents up. Corn made a net advance of 1/401%. Oats show a gain of 1/40. Provisions are practically unchanged.

## TAKE FOR GRANTED

The piano you want is here; liberal and fair treatment; reasonable prices and most considerate terms.

\$10 A MONTH **BUYS A GOOD PIANO** It is a pleasure for us to show you

the different makes and talk it over.

51 and 53 Main.

## \*\*\*\*\*\*\*\*\*\*\*\*\* COOL COOKING

# "Insurance" Gasoline Stoves

The heat is closely confined and not disseminated beyond the stove itself, giving heat where heat is required. They are cleaner, less expensive to operate, and in every way more satisfactory than coal stoves for summer cooking. See the display of new models in our window.
